

HyperX CloudX™ Pro Gaming Headset

hyperxgaming.com/headset

Built for the elite gamer.

HyperX CloudX™ Pro Gaming Headset is designed for Xbox and tested and approved by Microsoft. It works with the Xbox Elite Wireless controller and other Xbox One controllers with a 3.5mm stereo headset jack and provides connectivity from the headset to console and mobile devices¹. With additional Windows compatibility, it comes with a 2M PC extension cable with stereo and mic plugs.

Its 100% memory foam ear cushions and headband, interchangeable leatherette and velour ear cushions and over-the-ear cups let you play in award-winning comfort for hours on end. Two types of cushion allow for different textural comfort against the ear; the velour cushions provide breathable comfort.

HyperX CloudX features immersive in-game audio so you can lose yourself in the game while you're winning. Its rich sound quality has crystal-clear low, mid and high tones, and it's hi-fi capable, with 53mm drivers, enhanced bass reproduction and a closed-cup design. Its solid aluminium frame gives it long-lasting stability and durability.

Convenient in-line audio control lets you adjust the volume and mute the microphone right on the cable, while the detachable noise-cancelling microphone means clearer voice quality and reduced background noise for an improved in-game chat experience. The mic is easy to plug in for gaming and unplug for music-only purposes, and it's certified by TeamSpeak™ and compatible with Discord, Skype™, Ventrilo, Mumble and RaidCall.
